## PROFILE

As a software engineer, I pursue a life which fuels my passion for creation, development, and challenge. While primarily writing in the React, Node.js, Express.js, and MySQL ecosystem, I have refined my skills through various projects that challenge me to think creatively, but also challenge me to create the cleanest, most fluid code I can. I take pride not only in my code being clean and efficient, but also my ability to transform ideas into functional, high-quality solutions. I am a habitual learner in my free time and someone who also brings great communication, effort and efficiency to any team I am on.

## SKILLS

React.js, MySQL, Express.js, Node.js, RESTful APIs, Javascript, OAuth, Passport.js, Socket.io, HTML, CSS, Sass, Bash, Heroku, DigitalOcean, Version Control, Figma, Jira.

## PROJECTS

### Project Lead | [Pitstop](#)

MAY 2024, BRAINSTATION CAPSTONE

- Designed and developed a comprehensive Formula 1 web application that provides users with real-time data during live races.
- Utilized a tech stack including React, Node.js, MySQL, Express, and Sass to build a robust and responsive platform.
- Implemented user authentication, allowing users to log in and follow live updates on races, access current standings, and customize their profile page.

### Head of Software Engineering | [Spectra](#)

JUNE 2024, DELL TECHNOLOGIES x BRAINSTATION

- Engineered a web application for Dell Technologies to dynamically track and compare competitor pricing against Dell's MSRP, enhancing competitive marketing and pricing strategies.
- Employed a stack comprising React, Node.js, MySQL, Python, Express, and Sass to create an efficient and scalable solution.
- Developed features enabling users to log in, customize settings, view products with compliance ratings, track compliance breaches by competitors, and send alerts to the retailer directly from the app.
